

ErenFix

Product Presentation

General Information

THE IDEA

The idea for the Erenfix Complex was formulated years ago resulting from a passion for flying. Like others, I felt the effects of jet lag. After some research, it became clear that there wasn't a product on the market that offers a clear solution to the indicated problem. A thorough survey was followed by action, I successfully contacted one of Hungary's specialists and his team, who have proficient knowledge and experience in this field. By the end of the process we realized that the scope of use of this product, containing carefully selected ingredients, can be much broader and can help anyone to find everyday balance.

PRODUCT INFORMATION
